The passion for Money

Agenda

- What is Money?
- What is Currency?
- What is Bitcoin?
- Comparing Currencies & the Bitcoin economy

The story of the Rai stones at Yap

Yap Island in Micronesia

Currency at Yap

PIPING ROCKY OF YAP, WESTERN CAROLINE ISLANDS
Photo by John W. S. Paine, 1914, Department of Anthropology, University of Pennsylvania, Vol. 1, No. 1, p. 1, Fig. 2, 1914

Money is a concept

Money is a social concept enabling transfer of purchasing power

- Social
- Concept
- Purchasing power

Literally, Money means Purchasing Power

Money = Purchasing Power

- Time is *'Purchasing Power'*
- *'Purchasing Power'* never sleeps
- *'Purchasing Power'* can't buy love

The “features” of Money

- Unit of account
- Medium of exchange
- “Store of value”
- Accounting system

As a concept Money is similar to Language

*Language is a social concept enabling
transfer of messages*

(Money is to Commerce what Language is to Communication)

- Transfer of knowledge
- Mass communication
- Large scale cooperation

Agenda

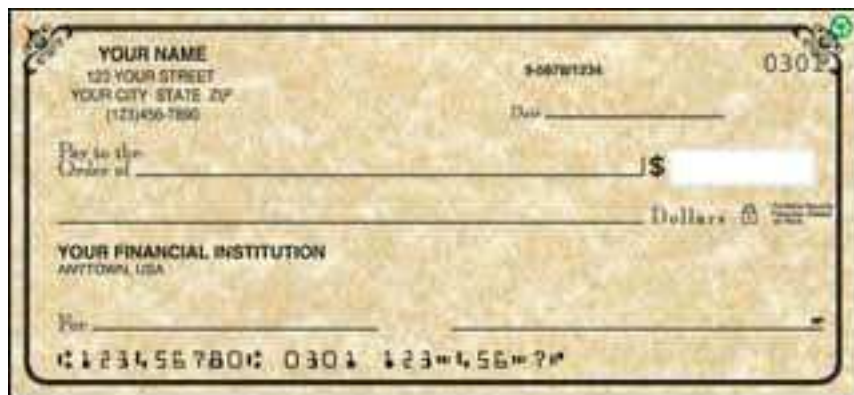

- What is Money?
- What is Currency?
- What is Bitcoin?
- Comparing Currencies & the Bitcoin economy

Currency is a Tool

Currency is a set of symbols that represents purchasing power

- Stones
- Gold Pieces
- Dollars
- Bitcoins

Currencies

Currency doesn't have to be...

- Of intrinsic value
- Backed by a government
- A legal tender
- Accepted as tax
- Accepted by everyone

Currency has to be...

- A set of symbols

Currency is similar to Language

Language is a set of symbols that represents things, actions, and attributes

- English
- Japanese
- C++

Examples of Currencies and Languages

<u>Currency</u>	<u>Examples</u>	<u>Payment</u>	<u>Language</u>	<u>Examples</u>	<u>Delivery</u>
Commodity	<ul style="list-style-type: none">▪ Salt▪ Shells▪ Gold	<ul style="list-style-type: none">▪ Raw Material▪ Coins	Human	<ul style="list-style-type: none">▪ English▪ Japanese▪ French	<ul style="list-style-type: none">▪ Verbal▪ Written▪ Signs
Fiat (Gov.)	<ul style="list-style-type: none">▪ Dollar▪ Yen▪ Pounds	<ul style="list-style-type: none">▪ Coins▪ Notes▪ Digital	Computer	<ul style="list-style-type: none">▪ C++▪ Java▪ Python	<ul style="list-style-type: none">▪ Cards▪ Digital
Crypto	<ul style="list-style-type: none">▪ Bitcoin▪ Litecoin	<ul style="list-style-type: none">▪ Digital			

5 requirements for a perfect Currency

	<u>Requirement</u>	<u>So that...</u>
Limited	<ul style="list-style-type: none">Final number of symbols	<ul style="list-style-type: none">No one can steal your relative purchasing power
Fungible	<ul style="list-style-type: none">Symbols are interchangeable. $A=B, B=A$.	<ul style="list-style-type: none">You can trade with anyone, anytime
Durable	<ul style="list-style-type: none">Symbols can survive time and weather	<ul style="list-style-type: none">You can save your purchasing power or pass it on
Divisible	<ul style="list-style-type: none">Symbols are easily divisible to smaller parts	<ul style="list-style-type: none">It can represent also small things
Transferable	<ul style="list-style-type: none">Symbols can be easily transferred	<ul style="list-style-type: none">It's practical to use

Agenda

- What is Money?
- What is Currency?
- What is Bitcoin?
- Comparing Currencies & the Bitcoin economy

Bitcoin is two things

*Bitcoin is both a protocol and a
currency*

Protocol

Think Internet. Network. Infrastructure. Technology.

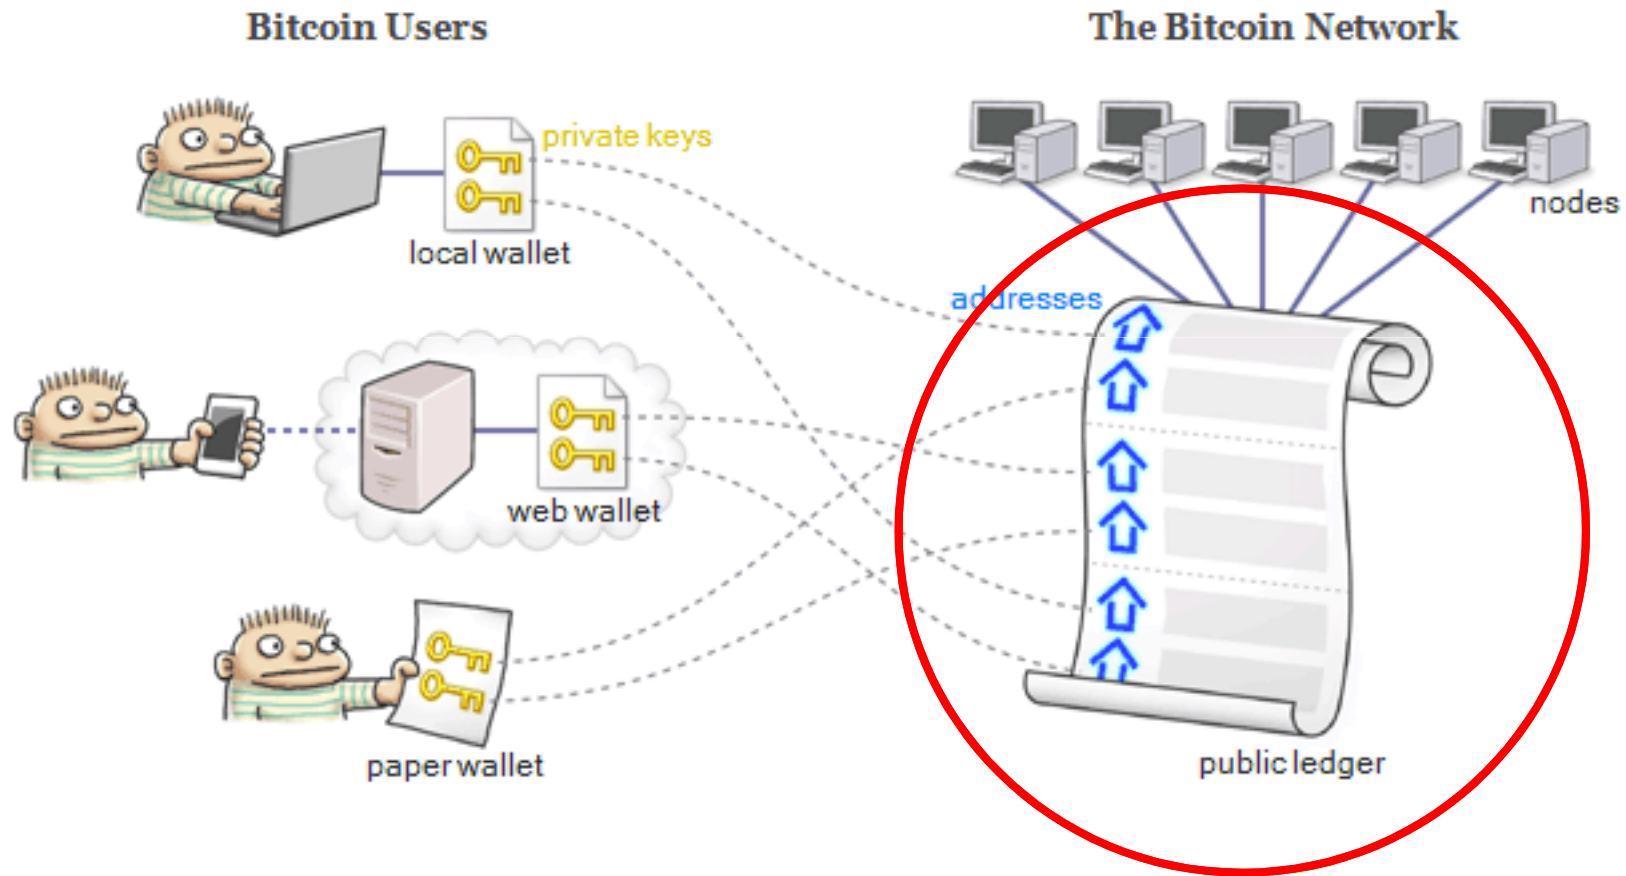

Currency.

Think email. (but also other applications)

Bitcoin uses a Public Ledger

Agenda

- What is Money?
- What is Currency?
- What is Bitcoin?
- Comparing Currencies & the Bitcoin economy

Receiving Currency

20 Rai

Physical symbol in limited supply

Not very clear who owns it.

20 Gold Coins

Physical symbol in limited supply

Clear to **you** that you have it and that the one gave it to you doesn't have it anymore

20 Digital £

Abstract symbol in limited supply

3rd Party is making sure that you have it and that the one gave it to you doesn't have it anymore

20 BTC

Abstract symbol in limited supply

Everyone knows that you have it and that the one gave it to you doesn't have it anymore

Comparing Currencies

	<u>Rai Stones</u>	<u>Gold</u>	<u>Dollar</u>	<u>Bitcoin</u>
Limited				
Fungible				
Durable				
Divisible				
Transferable				

The Bitcoin Economy

Commerce:

- Micro transactions
- Banking
- Shift of Risks
- Lower Transaction Costs

Cross Border:

- Remittances
- SMEs
- Decentralised corporations
- P2P lending

Political:

- Small Governments
- Efficiency
- Creative Destruction
- Balanced Global Economy

Deflation:

- Saving
- Positive ROI
- Durable goods

Progress

Progress is driven by entrepreneurs and the human spirit, not by currency supply!
